KEMENTERIAN PENGANGKUTAN

## MINISTER OF TRANSPORT'S WELCOME NOTE FOR THE MALAYSIA COMMERCIAL VEHICLE EXPO 2026

**YB Loke Siew Fook**  
**Minister of Transport**

Salam Sejahtera and Salam Malaysia Madani,  
Welcome to the seventh edition of the Malaysia Commercial Vehicle Expo (MCVE). It is a pleasure to join you at this important gathering, which has grown to become Southeast Asia's largest exhibition dedicated to the commercial vehicle industry since its inception in 2013. MCVE continues to serve as a vital platform for industry stakeholders to connect, exchange ideas, and gain firsthand insights into the evolving road transport sector.

In today's environment, the industry faces renewed challenges shaped by global and geopolitical developments. These circumstances call for resilience, innovation, and a willingness to adopt new approaches. The Ministry of Transport remains committed to supporting the industry, working closely with stakeholders to ensure that Malaysia's road transport ecosystem emerges stronger and more adaptive.

Safety remains a cornerstone of our efforts. We have made significant progress through initiatives such as the mandatory implementation of Speed Limiter Devices, and the integration of traffic summons data into the enhanced Driver Merit and Demerit System (Kejara). These measures reflect our belief that a safer transport industry is also a more efficient and profitable one. At the same time, we are taking a firm stance against irresponsible behaviour such as driving under the influence, reinforcing the importance of professionalism across the sector.

We are also encouraged by the continued collaboration between the Ministry and industry associations, including the active participation of the Association of Malaysian Hauliers. Platforms such as MCVE enable meaningful dialogue, ensuring that industry concerns are heard and addressed in a constructive manner.

Amidst the ongoing supply crisis in the Strait of Hormuz, the transition towards electrification is gaining momentum as well, with more operators exploring electric trucks and buses as viable solutions. This shift supports Malaysia's net-zero ambitions while prompting the industry to reassess technologies in light of evolving energy dynamics. At the same time, digitalisation and modern transport solutions will play an increasingly critical role in improving efficiency and strengthening last-mile connectivity, particularly in public transport.

As global developments highlight the vulnerability of transportation networks, it is imperative that we build a resilient and future-ready ecosystem. MCVE plays a crucial role in this effort, showcasing innovations and solutions that will help shape a stronger, more sustainable industry across Malaysia and the wider ASEAN region.

Today, MCVE stands as a key calendar event for the commercial vehicle sector: a marketplace where leading brands, service providers, and operators come together to engage, collaborate, and grow. I encourage all participants to take full advantage of this platform, and I welcome your feedback as we continue to refine and enhance our transportation policies.

On behalf of the Ministry of Transport, I extend my sincere appreciation to the organisers, particularly the team at Asian Trucker, for their continued dedication in bringing the industry together. I wish all exhibitors and visitors a productive and successful experience at the Malaysia Commercial Vehicle Expo 2026.

Thank you.  
YB Loke Siew Fook  
Minister of Transport

## **Asian Trucker Welcomes You To The Malaysia Commercial Vehicle Expo 2026: The Most International Instalment**

On behalf of the entire Asian Trucker team, I wish you a warm welcome to the seventh instalment of the Malaysia Commercial Vehicle Expo. This year is especially significant, as it is the most international exhibition we have hosted to date. This year's event has seen an influx of brands from abroad. As a novelty, we have the first ever country pavilion as part of our show. Beyond the interest of these companies in our exhibition, it is evident that the commercial vehicle market in Malaysia is an attractive one for brands eyeing expansion or expertise.

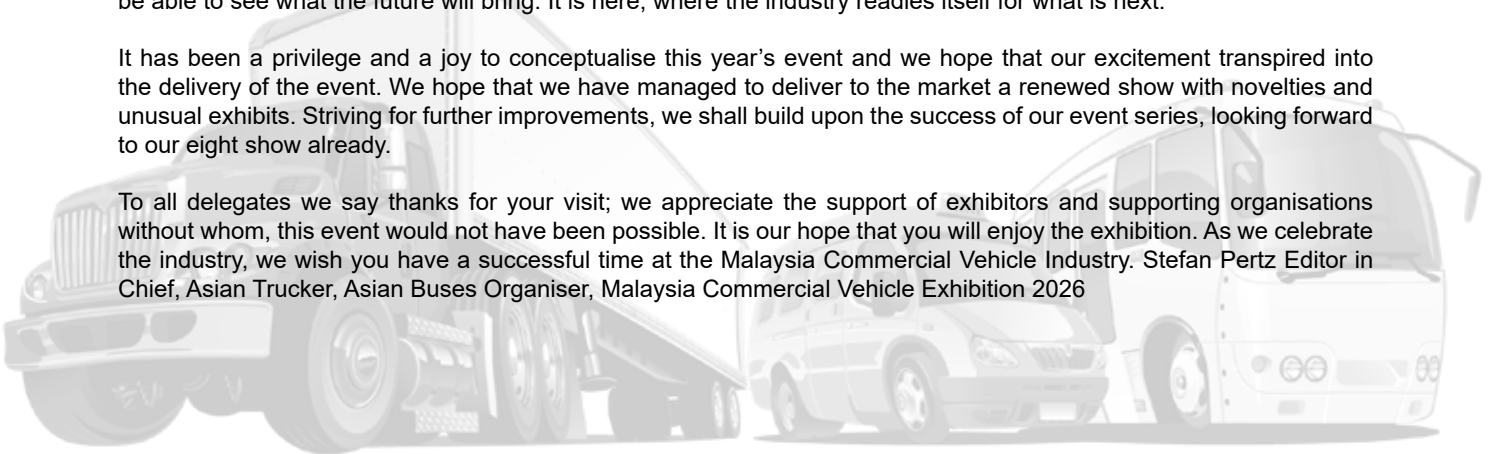

Thanks to our industry partners, the Malaysia Commercial Vehicle Expo 2026 also boasts the most extensive programme of seminars, presentations and talks. Information sharing and industry dialogues form an important part of our event. As another first, we compliment these sessions with an Experience Zone, in which we feature a new trend the commercial vehicle industry can profitably exploit: camping and caravanning.

The Malaysia Commercial Vehicle Expo 2026 would not have been possible to come to live without the support of our sponsors and supporters. We would like to thank them for their continued and extended support. Each of them has contributed in very specific ways, adding layer upon layer of context and content to the exhibition. For this we are grateful and we would like to again highlight that these contributions have made a difference.

Being the leading exhibition, the largest in Southeast Asia dedicated to the commercial vehicle industry, the event will be a showcase of innovations, new and updated products and concepts. The Malaysia Commercial Vehicle Expo 2026 is a magnifying glass, putting the current trends in focus for delegates to explore. It is here, where transport owners will be able to see what the future will bring. It is here, where the industry readies itself for what is next.

It has been a privilege and a joy to conceptualise this year's event and we hope that our excitement transpired into the delivery of the event. We hope that we have managed to deliver to the market a renewed show with novelties and unusual exhibits. Striving for further improvements, we shall build upon the success of our event series, looking forward to our eight show already.

To all delegates we say thanks for your visit; we appreciate the support of exhibitors and supporting organisations without whom, this event would not have been possible. It is our hope that you will enjoy the exhibition. As we celebrate the industry, we wish you have a successful time at the Malaysia Commercial Vehicle Industry. Stefan Pertz Editor in Chief, Asian Trucker, Asian Buses Organiser, Malaysia Commercial Vehicle Exhibition 2026

## **Asian Trucker Media provides a full range of communications channels for the commercial vehicle industry. Our platforms are aimed primarily at fleet operators and driver-owners in South East Asia.**

As the organisers, Asian Trucker Media wishes you welcome to the Malaysia Commercial Vehicle Expo (MCVE). This is where the region's transport and logistics community comes together; not just to observe the market, but to actively shape it.

At the heart of this gathering are our magazines, Asian Trucker and Asian Buses, platforms that have evolved far beyond the traditional definition of a trade magazine. While many publications focus on reporting industry developments, Asian Trucker Media was built to serve as a business ecosystem for the commercial vehicle sector. We connect fleet operators, OEMs, suppliers, regulators, and service providers across Malaysia and Southeast Asia.

Over the years, Asian Trucker has combined editorial insight with real-world industry engagement. Through our print and digital publications, readers benefit from in-depth coverage on trucks, buses, logistics, technology, and regulatory developments. But its true strength lies in going beyond the page by bringing stakeholders together through networking sessions, roundtables, product launches, and, most notably, MCVE itself.

What sets Asian Trucker apart, and underpins the success of MCVE, is its close connection to the industry's core audience. Its community is made up of those who make purchasing decisions, manage fleets, operate logistics networks, and influence policy. This ensures that every conversation, every exhibit, and every interaction at MCVE is grounded in real operational needs, from total cost of ownership and uptime to driver development and digital transformation.

In Malaysia, where the commercial vehicle sector is deeply interconnected and relationship-driven, this role is especially significant. Asian Trucker Media has positioned itself at the intersection of business, technology, and policy—serving not only as a source of market intelligence, but also as a platform for collaboration and progress.

As you explore our media channels, we encourage you to look beyond the products and brands we feature. We encourage you to use our platforms to engage with industry peers, exchange insights, and discover new ways to move your business forward. Whether you are utilising our channels to source solutions, build partnerships, or gain a deeper understanding of market trends, you are part of a community that is driving the future of transportation in Malaysia and beyond.

### BUILT FOR WHAT'S AHEAD

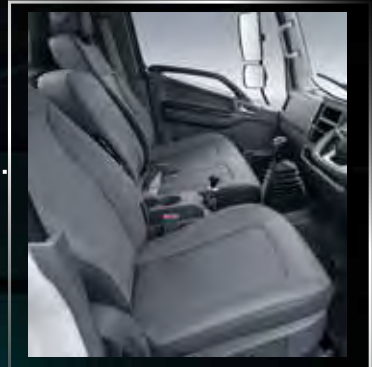

A new driver-centered interior with ergonomic features, adjustable controls, and a spacious, comfortable cabin for easy operation and enhanced driving experience.

A four-spoke multifunction steering wheel with cruise, call, and media controls, designed for a comfortable grip.

Advanced JAC Engine Series Euro VI emission standards, provide the most suitable power options for your needs.

An optional air suspension seat with a wrap-around design, armrests, and enhanced waist padding offers superior comfort, support, and durability for daily driving.

Better lighting performance with 40% brighter illumination, 30% longer range, and 50% lower energy consumption.

10.4-inch Touch Screen supports radio, Bluetooth audio & speakerphone, with integrated reverse camera (optional visual parking). Includes electric air conditioning control and optional tire pressure monitoring display. Compatible with Apple CarPlay & Android Auto for enhanced connectivity, entertainment, and communication.

A one-piece frame formed by a 6000-ton press increases strength by over 10%, using high-strength QSTE650 steel that is 37% stronger than conventional 510L steel.

New era lager vehicles Engine eternal power

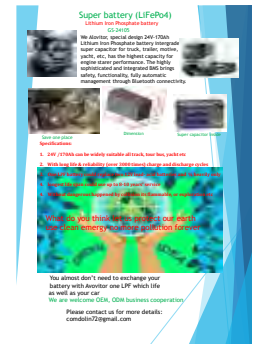

Alovitor is LFP power battery manufacturer. we specially design high cranking power battery, that use Lithium Iron Phosphate battery (LFP) intergraded with a super capacitor provided 24 voltages heavy-duty trucks, trailers, yachts, etc, and other motive power needs. This innovation delivers exceptional engine starting performance with greatest reliability. The advanced Battery Management System (BMS ensures safety standards full functionality management through Bluetooth connectivity.

**\*\*Key Benefits**

Universal Application- Suitable for all large vehicles tracks, lorry, tour buses, yachts and more.

Long life & reliability (over 3000 times) charge / discharge cycles  
Space & Weight Saving- One 24V LiFePO4 replaces two 12V lead-acid batteries at only 1/4 the weight

Durability – Service life of up to 8-10 years  
Enhanced Safety – Non-flammable, and impact-resistant, no risk of explosion.

AsiaRV, Bringing Premium European RV Solutions to Malaysia's Private and Commercial Markets

AsiaRV Sdn Bhd is shaping Malaysia's RV industry by introducing premium European caravans alongside MAN-based camper vans to a market with strong growth potential in tourism, rentals, mobile business, and lifestyle ownership.

At the core is the MAN-based camper van platform, built on a proven commercial vehicle foundation that appeals to operators who prioritise durability, drivability, workshop familiarity, and long-term support. It enables practical applications across rental fleets, tourism operations, mobile businesses, and branded activations.

Complementing this, AsiaRV's caravan range brings premium towable accommodation to an underserved segment, supporting both private use and commercial deployment.

Beyond supplying vehicles, AsiaRV is building the ecosystem required for success, including dealer networks, service readiness, localisation, compliance support, market education, and aftersales capabilities, making RV-based business models scalable and credible.

At MCVE, AsiaRV represents a new business category at the intersection of commercial mobility, engineering, tourism, and revenue generation.

### ASSOCIATION OF MALAYSIAN HAULIERS (AMH)

No. 88-B-2, Lebuhr Beringin, 42000 ,  
Port Klang, Selangor Darul Ehsan ,Malaysia

Tel: +603-31625656  
Contact: Mr Mohamad Azuan Masud  
Email: azuan@amh.org.my  
Website: www.amh.org.my

The Association of Malaysian Hauliers (AMH) was established in 2002 and represents over 300 container haulage companies across Malaysia. AMH serves as the collective voice of the haulage industry, advocating for policies, standards, and practices that support sustainable growth and operational efficiency.

Membership is open to licensed haulage operators approved by the relevant authorities, including APAD. AMH actively engages with government agencies, port authorities, and industry stakeholders to address key challenges such as cost pressures, regulatory compliance, and infrastructure development.

The association also promotes best practices in safety, operational excellence, and industry collaboration. Through continuous dialogue, knowledge sharing, and strategic initiatives, AMH aims to enhance the competitiveness and public image of the Malaysian haulage and logistics sector.

CB LONGMARCH TYRE SDN BHD was founded 2012. Our company is a distributor of commercial vehicle tyres serving the transportation and heavy-duty vehicle industry in Malaysia. With years of experience in the tyre market, we are committed to supplying the right products and reliable tyre solutions to fleet operators, transport companies, tyre dealers, and industrial users. Our core product range includes Light Truck Tyres, Truck & Bus Radial (TBR) tyres, and Off-The-Road (OTR) tyres, designed to meet the demanding requirements of logistics, construction, and heavy transport operations. We represent reputable international brands such as LONGMARCH Tyre and CEAT Tyre, which are recognized globally for their durability, performance, and cost efficiency in commercial applications. By working closely with established manufacturers, we are able to offer high-quality tyres, stable supply, and competitive solutions to our customers. Our focus is to support the transportation and industrial sectors with dependable tyre products that enhance safety, efficiency, and operational performance.

BLUETECH was established to meet the growing demand for high-quality AdBlue/AUS32 (Diesel Exhaust Fluid) and automotive coolant in the transportation and heavy-duty vehicle industries. Based in Malaysia, BLUETECH focuses on manufacturing reliable fluid solutions that support EURO 5 engine diesel emission systems, engine efficiency, and operational reliability. Through strict quality control and professional production processes, BLUETECH delivers consistent product performance and stable supply to fleet operators, logistics companies, and distribution partners.

CHER International Sdn. Bhd. (formerly known as Kitar Teliti Sdn. Bhd.) is an established tyre importer and distributor in Malaysia, with a strong presence in the industry since 1997.

The company specializes in the importation and distribution of well-known tyre brands such as Roadone, Goodyear, and Westlake, along with several exclusive brands within the Malaysian market. With an extensive network of branches and authorized dealers nationwide, CHER International ensures strong market coverage and reliable product availability across the country.

We provide a comprehensive range of tyre solutions, including truck and bus tyres, agricultural tyres, mining tyres, forklift tyres, and passenger car tyres, catering to various industries and operational needs.

CHER International is highly focused on supporting fleet operators and commercial transport businesses, where uptime and efficiency are critical. Our 24/7 breakdown assistance across Peninsular Malaysia ensures that your vehicles are supported at all times, reducing unexpected delays and operational disruptions. With a responsive and experienced support team, we are able to attend to breakdown cases promptly and efficiently. Our mobile truck service is built specifically for fleet support, allowing us to deliver on-site tyre inspection, repair, and replacement directly at your location — whether on the road, at your depot, or at project sites. This significantly reduces the need for towing, shortens downtime,

and helps fleet operators maintain delivery schedules and operational efficiency.

By combining strong product supply, nationwide coverage, and rapid-response service capabilities, CHER International positions itself as a reliable fleet tyre solutions partner, committed to helping businesses reduce downtime, optimize operating costs, and maximize vehicle performance.

#### DTEC – Your Trusted Partner in a Complete Ecosystem

For nearly three decades, **Diamond Technique Sdn Bhd (DTEC)** has supported Malaysia's commercial vehicle industry with reliable parts, professional distribution, and customer-focused service. Founded in 1996, the company has built a strong reputation for innovation, quality, and long-term partnerships with workshops and fleet operators across the country.

To better serve the evolving needs of the commercial vehicle aftermarket, DTEC operates through three core pillars: **DTEC-PARTS, DTEC PLUS, and DTEC FLEET**, delivering an integrated ecosystem of solutions for the industry.

**DTEC-PARTS**, established in 2006, is the company's flagship in-house brand specialising in premium replacement parts for European commercial vehicles. With more than **28,333 SKUs**, the brand is trusted for its quality, reliability, and compatibility in demanding operating conditions.

**DTEC PLUS** further strengthens the offering as a professional distribution network, supplying over **25,000 SKUs** of OEM and OE-quality spare parts from leading global manufacturers. Supported by strong logistics and responsive service, it ensures workshops and fleets receive the right parts on time.

Completing the ecosystem is **DTEC FLEET**, a growing fleet community focused on diagnostics, preventive maintenance solutions, tools, and technical training to help operators improve efficiency, safety, and long-term operational performance.

Together, these pillars reflect DTEC's commitment to delivering reliable aftermarket solutions and sustainable value for Malaysia's commercial vehicle industry.

Our Parts Our Hearts.

Lubetrans Test Lane for commercial vehicle pre-inspection is a purpose-built facility designed to ensure vehicles meet safety, performance, and regulatory standards before operation. It provides a systematic and efficient process for evaluating key components such as braking systems, suspension, tires, lighting, and emissions. By conducting thorough checks in a controlled environment, the test lane helps identify potential issues early, reducing the risk of breakdowns and costly downtime. Equipped with modern diagnostic tools and inspection equipment, the facility delivers accurate and consistent assessments for all types of commercial vehicles. This ensures compliance

with industry regulations while enhancing overall road safety. The Lubetrans Test Lane also supports fleet operators in maintaining high operational standards by streamlining the pre-inspection process. With reliable data and professional evaluation, businesses can confidently deploy vehicles knowing they are roadworthy, efficient, and ready for demanding daily operations.

### MDDRC — Driving Safety, Shaping Responsibility

The Malaysian Defensive Driving and Riding Centre (MDDRC) is a leading provider of professional driver and rider safety training in Malaysia, focused on improving road safety through practical skills, behavioural change, and real-world application.

With proven expertise and strong industry collaboration, MDDRC delivers high-impact programmes for individuals, corporations, and government agencies, supporting safer and more efficient road users nationwide.

### Practical, Impact-Driven Training

Programmes combine theory and hands-on practice, delivered in flexible formats from half-day to full-day sessions, ensuring real-world application and lasting impact.

### Commitment to Safer Roads

MDDRC is committed to delivering reliable, practical training that strengthens safety culture and reduces road risks across Malaysia.

### A Complete Training Ecosystem

MDDRC operates through three core pillars: MDDRC DRIVE, MDDRC RIDE, and MDDRC FLEET, offering an integrated approach to driver and rider safety.

-MDDRC DRIVE – Defensive driving training focused on hazard awareness, risk management, and vehicle control through theory and practical sessions.

-MDDRC RIDE – Motorcycle safety training emphasizing rider awareness, control techniques, and accident prevention.

-MDDRC FLEET – Fleet-focused solutions including driver assessment, safety programmes, and training to improve efficiency and reduce incidents.

Safer Driving. Safer Riding. Saving Lives.

RED ANT AUTO EQUIPMENT CO., LTD. | Overseas Promotion of Taiwan Vehicle Safety Solutions

RED ANT AUTO EQUIPMENT CO., LTD. specializes in international market development and export promotion of vehicle safety products. At MCVE 2026, Red Ant partners with Taiwanese manufacturer Leader Ku International co., Ltd. to present a multifunctional emergency fire-suppression device developed and manufactured in Taiwan, aiming to expand distribution across Southeast Asia and global commercial vehicle markets.

Leader Ku International is responsible for product R&D and manufacturing. The device received the Gold Medal at the 2019 Paris International Invention Exhibition and complies with multiple international safety certifications. It integrates a fire extinguisher, seatbelt cutter, and window breaker, designed for emergency use in commercial trucks, buses, and fleet operations.

**Key Features:**

- 3-in-1 multifunction design for emergency response
- Certified to handle A/B/C/F classes of fire
- Heat-resistant, anti-explosion cylinder for vehicle environments
- One-hand operation with long spray duration and distance
- Non-toxic, eco-friendly extinguishing agent

RED ANT AUTO EQUIPMENT CO., LTD. connects Taiwan manufacturing excellence with global distribution, delivering reliable safety solutions and seeking international partners.

Rogers Asia Malaysia is a part of the Rogers Asia Group which first office was established in the United Kingdom, specializes in worldwide exhibition material movement and offers full installation services on-site. Established in 1984, we are the first company in Malaysia exclusively handling international exhibition freight into Malaysia. Since then, the company has expanded and now operates from its own office/warehouse in Shah Alam. The full-time staff is actively involved in the exhibition industry, providing comprehensive services including customs clearance, necessary licenses, and relevant handling and lifting equipment. In May 2003, a management buyout from our parent company, Rogers United Kingdom, occurred, making Rogers Asia Malaysia completely independent, with all shareholders based in Malaysia.

SafeTruck is a pioneer in fleet management, transforming logistics across Malaysia, Singapore, Thailand, Indonesia, the Philippines, and Pakistan through advanced telematics, IoT, and AI.

Our ISO 27001-certified operations and 5/5 MIROS TrackScore rating reflect a commitment to industry excellence—driving safety, efficiency, cost savings, and sustainability.

Our unified FMS platform brings together diverse IoT intelligent features—cold chain management, fuel analytics, asset utilisation—and fully integrated AI-powered safety management.

Through our AI-Powered SafeVision, real-time alerts and intelligent driver-safety scoring deliver advanced risk mitigation, while high-definition video triggers and detailed behaviour analytics provide clear visual evidence for incident investigation and coaching.

DriverCare further streamlines daily operations with APAD-compliant pre-departure checklists, HOS-compliant rest-hour management, and an AI-driven driver scoreboard.

These capabilities help enforce a safer driving culture, aligned with ISO 39001 and APAD ICOP compliance.

Supported by 24/7 expert service, SafeTruck empowers fleet owners to achieve peak productivity while building a transparent, zero-accident culture.

**ZONG HONG AUTOMOBILE PARTS CO., LTD.**, established in 2015, specializes in the research, development, manufacturing, and supply of Japanese and European commercial vehicle components. The company is dedicated to delivering high-quality and comprehensive diesel vehicle solutions. Its core product portfolio includes high-pressure common rail injectors, NOx sensors, diesel engine ECUs, and DPF/SCR exhaust aftertreatment filtration systems, which are widely applied across commercial vehicle fuel systems, aftertreatment systems, and exhaust systems.

The company's founder began his career in 2007 with the establishment of Xinyong Automobile Co., Ltd., focusing on commercial vehicle maintenance and repair services. Years of hands-on industry experience enabled the development of strong technical expertise and long-term customer trust. In response to evolving market demands and technological advancements, Zong Hong Automobile Parts was founded in 2015 to transform practical service experience into product innovation and systematic supply capabilities.

Driven by technical expertise, consistent quality, and continuous innovation, Zong Hong is committed to providing competitive diesel components and integrated solutions that enhance vehicle performance and operational efficiency for the global commercial vehicle market.

# OE INSIDE
